

Hudson-Delaware Chapter of the Society of Environmental Toxicology and Chemistry

HDC SETAC presents the 2018 Annual Spring Meeting
Wednesday - Thursday, April 25-26, 2018
Rowan University, Courtyard Marriott, Glassboro, NJ

Registration:
HDC Member -
\$150 (\$165 late)
Student - \$75 (\$85 late)

Late Registration starts on
April 19, 2018

See www.hdcsetac.org for
agenda and more details

Ecosystem Services: What can the environment do for you?

The assessment of ecosystem services and the benefits nature provides to people, has become a focal point of regulatory strategy and risk assessment frameworks. Ongoing research into understanding and quantifying these services can greatly benefit entities involved in environmental regulation, land use planning, and the strategic deployment of resources. The benefits of ecosystem services are plentiful, and include fields of study such as nutrient cycling, biodegradation and bioremediation, habitat restoration, and wetland ecology. Remediation and restoration of contaminated or degraded sites can enhance ecosystem services in addition to decreasing risks to human health and the environment.
